EXECUTIVE SUMMARY

Undergraduate Information Systems student at UPN “Veteran” Jawa Timur with a GPA of 3.96/4.00 and strong interest in website development, UI/UX design, and business analytics. Experienced in website management, IT support, and digital content optimization through internship and organizational activities. Skilled in fullstack web development, user flow planning, database management, and responsive interface design using Laravel, Tailwind CSS, MySQL, and Figma. Highly adaptive, detail-oriented, and eager to contribute to technology-driven projects and digital innovation.

EDUCATION

UPN “Veteran” Jawa Timur — Bachelor of Information Systems, Faculty of Computer Science Aug 2024 – Present

GPA 3.95 of 4.00

Relevant Coursework: Database Systems, Web Programming, UI/UX Design, Data Analytics, Systems Analysis & Design

TECHNICAL SKILLS

Programming Language: Java, PHP, JavaScript, HTML, CSS

Frameworks & Libraries: Laravel, Tailwind CSS, Flutter

Database: MySQL

UI/UX Design: Figma, User Flow Planning, Wireframing, Prototyping

Tools & Others: Git, GitHub, Visual Studio Code, Canva, Microsoft Office

SOFT SKILLS

- Communication & Team Collaboration
- Leadership & Project Coordination
- Problem Solving & Analytical Thinking
- Time Management & Adaptability
- Initiative & Growth Mindset

CORE COMPETENCIES

- Frontend Development
- Backend Development
- Fullstack Web Development
- UI/UX Design
- Mobile Application Development
- Database Management
- Data Analytics
- Business Analysis

PROJECTS

Shuttle Click Badminton Desktop Application (Visual Studio .NET, MySQL) — System Analyst 2025

Information System UPN “Veteran” Jawa Timur

- Analyzed system requirements and designed process workflows for badminton reservation and cashier operations.
- Created system flow and user process planning as the foundation for UI/UX design and application development.
- Collaborated in booking, payment, and data management system planning.

KOK.IN AJA (Figma) — UI/UX Designer

2025

UI/UX Competition

- Designed user-centered mobile interface and user flow for digital platform solutions.
- Created wireframes, prototypes, and visual design systems using Figma.
- Conducted interface improvement and usability planning to enhance user experience.

JW Marriott Reservation Desktop App (Java NetBeans, MySQL) — Backend Desktop Developer

2025

Information Systems UPN “Veteran” Jawa Timur

- Developed backend functionalities for desktop-based reservation management system.
- Designed database structure and handled data processing using SQL.
- Implemented system logic and data management for booking operations.

FLOMART E-Commerce Website (Laravel, MySQL, Tailwind CSS) — Fullstack Web Developer

2026

Information Systems UPN “Veteran” Jawa Timur

- Contributed as a Fullstack Web Developer in a team-based e-commerce website development project using Laravel and MySQL.
- Implemented core features including product management, user authentication, and transaction processing with integrated database functionality.
- Developed responsive user interfaces and improved website usability across multiple devices.

Link GitHub: <https://github.com/Titaniakaylife24/FLOMART-uas.git>

FLOMART E-Commerce Mobile Application (Flutter) — Frontend Mobile Developer

2026

Information Systems UPN “Veteran” Jawa Timur

- Developed responsive mobile e-commerce application interfaces using Flutter.
- Designed user-friendly mobile UI for product browsing, authentication, and transaction features.
- Improved user experience through responsive and user-centered interface implementation.

Link GitHub: https://github.com/Titaniakaylife24/FLOMART_mobile.git

InLife Inventory Management System (Laravel, MySQL, Tailwind CSS) — Fullstack Web Developer

2026

Information Systems UPN “Veteran” Jawa Timur

- Developed a web-based inventory management system using Laravel and MySQL to manage product data, stock movement, and user access control.
- Implemented role-based authentication and authorization features for Admin, Manager, Staff, and Employee users.
- Designed responsive dashboard interfaces with inventory monitoring, reporting features, and data visualization to improve operational efficiency.
- Deployed and configured the application on Railway cloud platform for online accessibility.
